**Shopping Cart Page:**

Low-fidelity prototype

High-fidelity prototype

Actual shopping cart webpage: https://rituroy19.github.io/assgn6/shopping-cart.html

The low-fidelity prototype changed based on the requirements I had for this assignment. Instead of having an entire checkout page, I just showed the 'Items in your cart' section and 'Items you may like' section. Items in your cart reflect the entire shopping cart that takes in the order from different product pages. Items you may like suggests a select few rolls that the user might want to want to buy other than what they have in the cart. The page also shows the total price and delivery time.

The high-fidelity prototype changed based on the previous assignment and the updated sketch. The colours have updated to the pink and brown version to match the brand identity and uniformity for the bun bun bake shop. This page can be reached by clicking on the cart on the top-right side of the navigation bar of any page. The page has a checkout button now which will lead to further steps and the user can glance through their cart on this page and see all the items together and get recommendations for more items to buy on the right side.

GitHub Repo: https://github.com/rituroy19/rituroy19.github.io (assgn6 folder - includes 1 javascript file, HTML & CSS file for shopping cart page, previous HTML & CSS files from assignment 5)
Website: https://rituroy19.github.io/assgn6/home.html

As you arrive on the website, please navigate to Rolls (product browsing page) and select the Walnut Cinnamon Roll (product page: https://rituroy19.github.io/assgn6/walnut.html). This page has the implementation of the assignment 6A:
- As you select the glaze, you see the updated images and text notifying your selection.
- And as you select the quantity, there is a text notifying your selection.
- When you click on Add to Cart, a box appears above notifying you have added to cart
- And the cart icon on the top-right updates to the number of items in your cart as you progressively keeping adding to cart with different selections.
